

PLC – PFC200 Controller

PFC200 CS 2ETH RS 3G

The PFC200 Controller is a compact PLC for the modular WAGO-I/O-SYSTEM. In addition to providing commonly used network and fieldbus interfaces, the controller supports all digital, analog and specialty I/O modules in the 750/753 Series.

Two ETHERNET interfaces and an integrated switch enable line topology wiring – no extra-cost hardware is needed.

The controller's mobile radio module sends and receives SMS while providing wireless Internet connectivity.

An integrated Webserver provides user configuration options and displays PFC200 status information.

Besides standard machinery and equipment control, as well as building automation, typical applications for the PFC200 include decentralized data logging for the process industry.

The controller's programming complies with IEC 61131-3.

- Programmable via WAGO-I/O-PRO V2.3
- Direct connection of WAGO I/O modules
- 2 x ETHERNET (configurable), RS-232/-485
- Linux operating system with RT-Preemption patch
- Configuration via CODESYS, e!COCKPIT (750-8207, 750-8207/025-000) or Web-Based Management user interface
