## Photoelectric Sensors

# PHOTOELECTRIC SENSORS

Tubular, Miniature and Fiber Optic sensors for object detection in reduced space

IO-Link

IO-Link

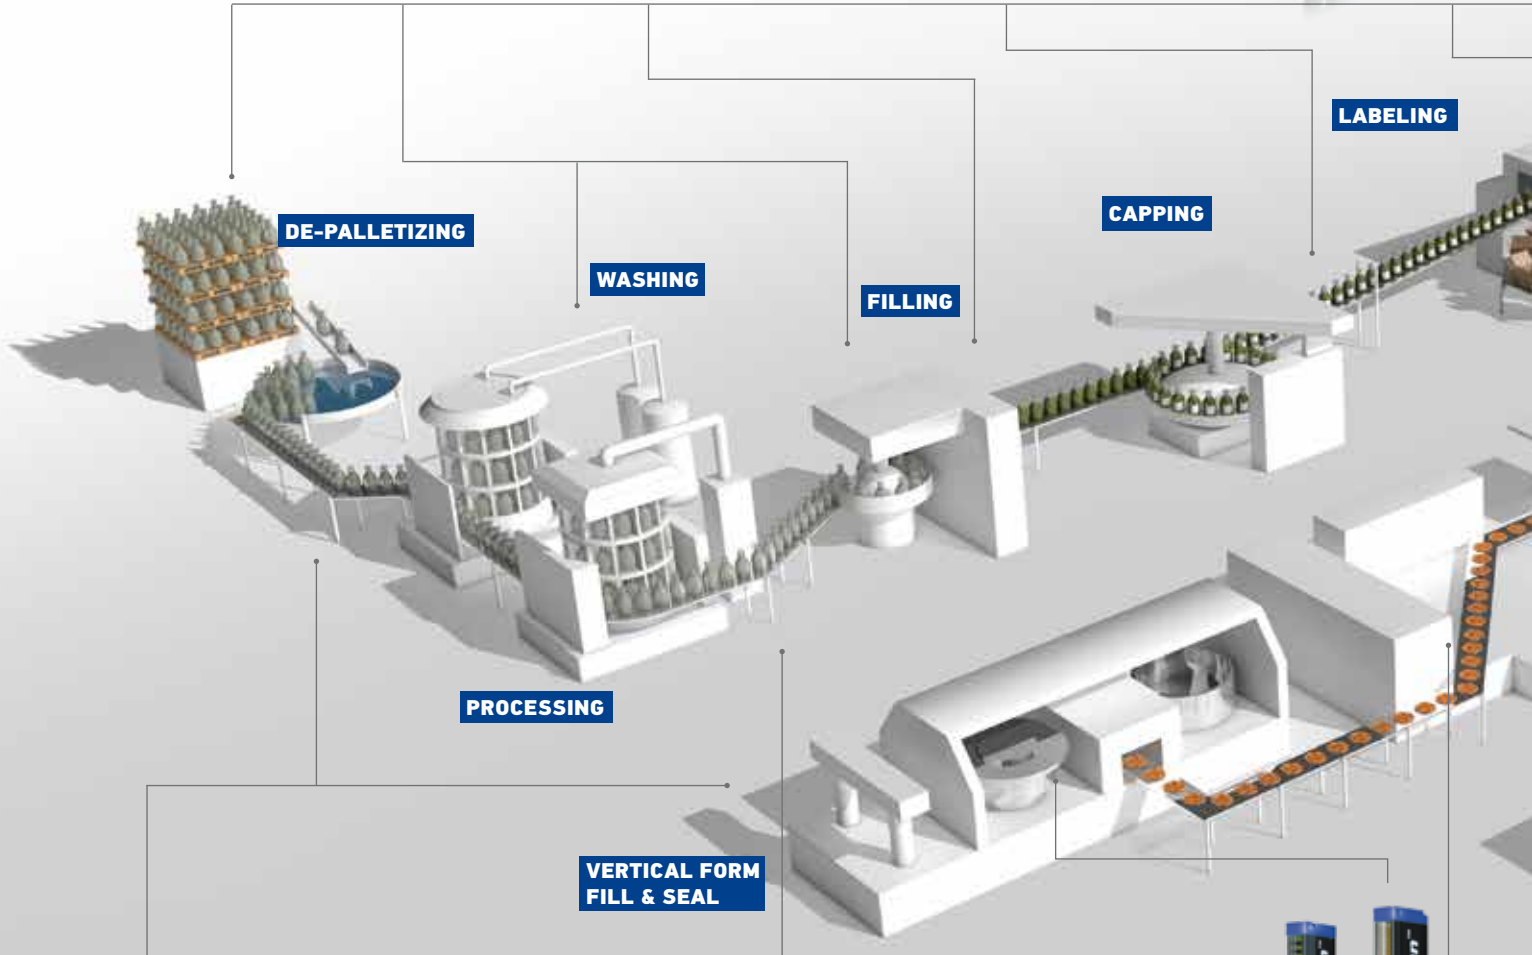

IO-Link

Fork sensors for label detection

Contrast and Luminescence sensors for registration marks detection

Extended range of universal compact sensors for object detection

Smart-VS: The Smart Vision Sensor can detect the presence/absence and orientation of various format objects

Dimensional sensors for height/width measurement and object positioning

## Applications

- De-Palletizing
- Washing
- Filling
- Capping
- Labeling
- Case Packing
- Stretch-wrapping
- Palletizing
- Storage & Retrieval
- Cartoning
- Wrapping
- Vertical Form Fill & Seal
- Processing

**Datalogic** has more than 40 years of experience in the sensors and safety sector, developing their first product, a **Photoelectric Sensor**, in 1972. Today, Datalogic is one of the largest manufacturers of sensor and safety products worldwide.

**Datalogic** is the market leader in Italy for photoelectric sensors and safety light curtains, ranking among the **top-10 manufacturers** in Europe by market share.

Datalogic's **Sensors and Safety** portfolio solves customer applications in **Factory Automation**, specializing in Processing and Packaging machinery, and Automated Material Handling Systems related to manufacturing industries such as Automotive, Electronics, Pharmaceutical, Food & Beverage, Paper and Printing, Wood-working, Ceramics, Glass, and Textiles.

Area sensors for the detection of objects with different shape and dimensions

Maxi and Compact sensors for object detection

IO-Link

STRETCH-WRAPPING

PALLETIZING

CASE PACKING

STORAGE & RETRIEVAL

WRAPPING

CARTONING

TOF distance sensors for measurement and object positioning

IO-Link

Background suppression sensor with Infrared LED Emission TOF technology to detect objects with irregular surface and different colors avoiding surface reflections. The S65-M is very suitable for level detection in sorting applications for food, logistic and postal industries

# PHOTOELECTRIC SENSORS

# PHOTOELECTRIC SENSORS

## THROUGH BEAM

The light emitter and receiver are contained in two different housings and installed facing each other. The light beam released by the emitter directly hits the receiver; every object interrupting the beam is therefore detected. This system is used to obtain significant signal differences (when the light directly hits the receiver and when the object interrupts the beam) with the highest Excess Gain and the largest operating distance (up to 60 m). Moreover, these sensors can operate in the harshest working conditions, such as dirty or dusty environments. The through beam optic function typically operates in the dark mode: the output is activated when the object interrupts the light beam between emitter and receiver.

## RETROREFLECTIVE

Both emitter and receiver are located inside the same housing for retro-reflective photoelectric sensors. Utilizing a prismatic reflector, the emitted light beam is reflected onto the receiver, detecting the object when it interrupts the light beam.

## POLARIZED RETROREFLECTIVE

In polarized retroreflective sensors, the emitted light is polarized on a vertical plane through a polarization filter. The prismatic reflector rotates the light plane by 90°. A polarization filter placed on the receiver selects only the horizontal plane reflected by the prismatic reflector, ignoring the light reflected by other light sources. This technique guarantees a reliable signal reception, reaching significant distances-

## RETROREFLECTIVE FOR TRANSPARENT

For the detection of transparent objects, such as PET bottles or Mylar sheets, a low-hysteresis polarized retroreflective model (which detects small signal differences) can be used.

These sensors elaborate the slight signal differences received when the light beam passes through a transparent object, avoiding false detections due to the nature of this kind of targets.

This technique mostly suits applications for the detection of objects positioned at considerable distances, where a prismatic reflector can be installed.

Typically, the operating distance proportionally increases with the reflector's dimensions.

## DIFFUSE PROXIMITY

In photoelectric sensors with this optic function, both emitter and receiver are placed inside the same housing. These sensors work with weaker signals because the emitted light beam is reflected to the receiver by the object. As a consequence, the excess gain and the operating distance are reduced. However objects are detected without a prismatic reflector, making installations quick and easy.

## FIXED FOCUS PROXIMITY

Fixed focus proximity sensors have a simple fixed background suppression distance, beyond which no objects are detected. The fixed triangulation of the optics greatly reduces the detection distance of reflective objects. The visible red emission simplifies the sensor's installation.

## BACKGROUND SUPPRESSION

Background suppression sensors detect objects while avoiding reflections from the background. When the sensor is used for the first time, the proper background suppression distance has to be set through a distance adjustment trimmer. Once the background has been acquired, the objects can be detected regardless of their color. Background suppression sensors are not very reliable with highly clear, transparent or shiny objects.

## BACKGROUND SUPPRESSION

### FOR CLEAR DETECTION

Background suppression technology often has difficulty to detect reliably transparent, clear, or shiny objects. These objects generate false detections due to their highly reflective surfaces. Datalogic's patented background suppression technology guarantees reliable and repeatable detection, avoiding false detections. These models are available with LED emission, ideal for reflections caused by moving surfaces such as conveyor belts, or with LASER emission for the detection of small objects on fixed or highly reflective backgrounds. These sensors can substitute a short distance polarized retroreflective sensor for transparent objects, since they do not require a prismatic reflector.

# PHOTOELECTRIC SENSORS

## CONTRAST

Contrast sensors distinguish the received light beams on the basis of their degrees of intensity, which depend on the color or material of the detected surfaces. A typical application of these sensors is the detection of colored registration marks used in packaging machines to synchronize the folding, cutting and welding phases. In presence of colored surfaces, the contrast is highlighted using a LED with colored light emission, typically a selectable red, green or blue LED. The white light emission allows to detect very slight contrasts in similar materials and colors.

## COLOR

The color of an object is identified according to the different reflection coefficients obtained with the red (R), green (G) and blue (B) light emissions. For instance, yellow is characterized by R=50% G=50% B=0% reflections, orange by R=75% G=25% B=0%, pink by R=50% G=0% B=0%, the combinations are infinite. Color sensors cover a wide variety of applications, ranging from quality and process controls to automatic material handling for the identification, orientation, and selection of objects according to their color.

## LUMINESCENCE

Luminescence sensors emit invisible ultraviolet light, which is reflected at a higher wavelength (minor energy) on the fluorescent and phosphorescent surface, shifting into the visible light spectrum.

The ultraviolet emission is modulated and the visible light reception is synchronized. The maximum immunity against external interferences, like reflections caused by very shiny surfaces, is obtained and fluorescent targets, invisible to the human eye, can be detected. Luminescence sensors are used in several industrial fields to detect items containing phosphorous such as labels on glass or mirrors, fluorescent marks marked on tiles, fluorescent glues on paper, cutting and sewing guides, as well as fluorescent paints or lubricants.

## FORK

A fork sensor, is based on a particular model of the through beam sensor, where emitter and receiver are placed opposite to each other on the internal sides of an "U-shaped" housing. Any target passing through the internal slot interrupts the beam and is detected. The most typical fork sensor applications are hole/teeth detection on wheels, label detection on thin supports, and control of edge and continuity of sheets of labels or tapes. The emission is generally infrared or red light in order to detect colored registration marks on translucent films.

## DISTANCE

Datalogic distance sensors are based on Time of Flight (T.O.F.): the distance is calculated on the basis of the time between the moment the LASER pulse is generated and the moment the emitted light is reflected off the object, back to the sensor. These sensors are generally used to measure an object's distance within a selected range, while the output is linearly scaled to the analog signal. This technology provides high precision and fast measurements in many applications, such as automatic warehousing (to drive industrial vehicles and avoid collisions), packaging and material handling.

## DIMENSION

Area and Dimension light grids utilize several light beams for area or dimensional measurements of objects. An object's area and size are measured using parallel cross-beams, which identify obscured beams, providing accurate information to a host GUI or PC. Models of light grids vary by length to match each application requirements.

## SMART VISION SENSOR

The Datalogic Smart Vision Sensor offers improved detection features with an easy setting procedure, without the need of specific machine vision skills. The application field addressed can vary from automotive for parts checking to food, beverage and cosmetic packaging, such as bottling with specific tools for: label presence; label printing, cap presence and orientation.

## IO-Link

**IO-Link** is a short distance, bi-directional, digital, point-to-point, industrial communication network standard IEC 61131-9 used for connecting sensors to either industrial fieldbus or Ethernet, in order to provide an enriched sets of data for economically optimizing industrial automated processes and operations.

An IO-Link system consists of an IO-Link master and one or more IO-Link devices, i.e. Photoelectric Sensors. The IO-Link master provides the interface to the higher-level controller (PLC) and controls the communication with the connected IO-Link devices.

An IO-Link master can have one or more IO-Link ports to which only one Device can be connected at a time. This can also be a "hub" which, as a concentrator, enables the connection of more intelligent sensors.

Intelligent, with regard to IO-Link, means that a device has identification data e.g. a type designation and a serial number or parameter data (sensitivities, switching delays or characteristic curves) that can be read or written via the IO-Link protocol. This allows parameters to be changed by the PLC during operation, for example. Intelligent also means that it can provide detailed diagnostic information.

IO-Link and the data transmitted with it are often used for preventive maintenance and servicing, e.g. it is possible to set an optical sensor in such a way that it reports via in good time if it threatens to become dirty. Cleaning no longer comes as a surprise and blocks production; it can now be put on a production break.

The parameters of the sensors and actuators are device- and technology-specific, which is why parameter information in the form of an IODD (IO Device Description) with the description language XML. The IO-Link community provides interfaces to an "IODD Finder", which can be used by engineering or master tools to present the appropriate IODD for a device.

## COMPLETE LINE OF AMPLIFIED SUBMINIATURE PHOTOELECTRIC SENSORS

- 15mm, 20mm, 30mm and 50mm fixed focus proximity
- 1,5m retroreflective and 1m polarized retroreflective
- 2m through beam models
- Amplified NPN or PNP output with NO-NC output

### APPLICATIONS

- Processing and Packaging machinery
- Electronics assembling
- Beverage & Bottling
- Vending machines

## THE UNIVERSAL MINIATURE PHOTOELECTRIC SENSOR

- Two threaded front mounting holes
- Two slotted rear mounting holes
- Anti-tampering sensor (no adjustment)
- High speed high resolution RGB contrast sensor available
- Transparent object detection
- M8 connector and cable models
- PNP or NPN models with Light/Dark selection by wire
- Plastic housing, IP67 mechanical protection
- IO-Link COM2 communication protocol
- IO-Link V1.1.2 version
- IO-Link extended parametrization for monitoring and maintenance

### APPLICATIONS

- Processing and packaging machines
- Conveyors
- Automatic warehousing
- Intralogistic lines
- Bottling
- Cosmetic and Pharma machinery
- Industry 4.0 application compliant

## ADVANCED GLOBAL STYLE MINIATURE PHOTOELECTRIC SENSOR

- 50-250 mm background suppression
- 0.7 m proximity, 150 mm with narrow beam
- 4 m polarized retroreflective
- 15 m through beam
- Light and dark trimmer models
- Standard 3-wire output configuration

### APPLICATIONS

- Processing and Packaging machinery
- Electronics assembling
- Transportation lines, material handling
- Automatic warehouses
- Cosmetics and Pharmaceutical industry
- Small part detection with maximum accuracy

# S45

## HIGH PERFORMANCE EUROPEAN STYLE MINIATURE SENSOR ALL-IN-ONE FAMILY

- Red LED and Laser emissions
- Precise risk free laser class 1 emission
- Diffused LED proximity 800mm
- Background Suppression 400mm
- Retroreflective Class 1 Laser 15m/Red LED 7m
- Through beam Class 1 Laser 20m/Red LED 15m
- IP69K housing
- 2m Cable or metal M8 4 pole version
- PNP or NPN output with remote teach in input
- High speed RGB and white emission contrast sensor
- High precision distance sensor up to 200 mm

### APPLICATIONS

- Processing and Packaging machinery
- Cosmetic and Pharmaceutical industry
- Electronics assembling
- Conveyor lines, material handling
- Automotive industry
- Print and paper industry
- Small part detection with maximum accuracy

# S5N

## EXTENDED RANGE OF STANDARD “ONE FOR ALL” PHOTOELECTRIC TUBULAR M18 SENSORS

- All optic functions
- Improved EMI immunity
- Improved ambient light immunity
- Improved laser safety level
- M18 flat plastic with universal mounting
- Available in M18 metal housing
- Axial or radial optics, cable or connector
- Standard 4-wire NO-NC NPN or PNP output
- IO-Link connectivity V1.1 with double channel

### APPLICATIONS

- Processing and Packaging machinery
- Conveyor lines, material handling
- Ceramics intralogistics
- Automated warehousing

# S62

## THE MOST COMPLETE UNIVERSAL SENSOR IN A COMPACT 50X50 MM HOUSING

- Sensors with red, infrared LED or LASER emission
- Background suppression from 3 cm to 2 m
- Polarized retroreflective up to 20 m
- Multivoltage 24-240Vac/24-60Vdc with Relay output
- NPN/PNP output NO-NC configuration

### APPLICATIONS

- Processing and Packaging machinery
- Conveyor lines, material handling

S62		
<b>Through beam</b>	0...25 m

# S70

**IO-Link**

## ADVANCED FIBER OPTIC AMPLIFIERS FOR HIGH SPEED AND LOW CONTRAST APPLICATIONS

- DIN rail mounting
- Double digital display
- High Speed models: 200  $\mu$ s ... 5 ms
- Super High Speed models: 10  $\mu$ s ... 1ms
- Teach-in setting via switch / button + / SET / -,
- Remote input
- IO-Link communication V1.1 COM2 2,3ms cycle time
- High level of parameterization
- Normalized connection with 2 m or 4-pole M8 cable

### APPLICATIONS

- Processing and Packaging machinery
- Electronics assembling
- Pharmaceutical industry
- Cosmetic and bottling industries

### S70

<b>Response time</b>		Super high speed: 10 $\mu$ s (S70...E2) High speed: 200 $\mu$ s (S70...E1), 15 $\mu$ s (S70...E2), 250 $\mu$ s (S70...E3) Fast: 50 $\mu$ s (S70...E2), 500 $\mu$ s (S70...E3) Standard: 500 $\mu$ s (S70...E1), 250 $\mu$ s (S70...E2), 1 ms (S70...E3) Medium range: 500 $\mu$ s (S70...E2) Long range: 2 ms (S70...E1), 1 ms (S70...E2), 4 ms (S70...E3) Extra long range: 5 ms (S70...E1), 12 ms (S70...E3)
	<b>Repeatability</b>	Super high speed: 5 $\mu$ s (S70...E2) High speed: 66 $\mu$ s (S70...E1), 5 $\mu$ s (S70...E2), 100 $\mu$ s (S70...E3) Fast: 12 $\mu$ s (S70...E2), 150 $\mu$ s (S70...E3) Standard: 100 $\mu$ s (S70...E1), 50 $\mu$ s (S70...E2), 180 $\mu$ s (S70...E3) Medium range: 80 $\mu$ s (S70...E2) Long range: 100 $\mu$ s (S70...E1), 165 $\mu$ s (S70...E2), 180 $\mu$ s (S70...E3) Extra long range: 100 $\mu$ s (S70...E1), 180 $\mu$ s (S70...E3)

# TECHNICAL DATA

<b>Power supply</b>	10...30 V (current output models and digital output models) 12...30 (voltage output models)
<b>Ripple</b>	10% max.
<b>Consumption (output current excluded)</b>	40 mA max. (standard display mode), 30 mA max. (ECO display mode)
<b>Light emission</b>	red 660 nm (mod. S70...E1, S70...E3) red 635 nm (mod. S70...E2)
<b>Setting</b>	+ / SET / - push-button, LIGHT / DARK switch, RUN / PRG / ADJ mode switch yellow OUTPUT LED
<b>Indicators</b>	red SIGNAL LEVEL 4-digit display green THRESHOLD 4-digit display
<b>Output</b>	PNP or NPN PNP and push-pull (IO-Link mod. S70...PZ)
<b>Output current</b>	100 mA max.
<b>Saturation voltage</b>	1,5 V max. (mod. S70...N) 2 V max. (mod. S70...P/PZ)
<b>Response time</b>	Super high speed: 10 µs (S70...E2) High speed: 200 µs (S70...E1), 15 µs (S70...E2), 250 µs (S70...E3) Fast: 50 µs (S70...E2), 500 µs (S70...E3) Standard: 500 µs (S70...E1), 250 µs (S70...E2), 1 ms (S70...E3) Medium range: 500 µs (S70...E2) Long range: 2 ms (S70...E1), 1 ms (S70...E2), 4 ms (S70...E3) Extra long range: 5 ms (S70...E1), 12 ms (S70...E3)
<b>Switching frequency</b>	S70...E1: 2,5 kHz (High Speed), 1 kHz (Standard), 250 Hz (Long Range), 100 Hz (Extra Long Range) S70...E2: 50 kHz (Super High Speed), 33 kHz (High Speed), 10 kHz (Fast), 2 kHz (Standard), 1 kHz (Medium Range), 500 Hz (Long Range) S70...E3: 1 kHz (High Speed), 500 Hz (Fast), 250 Hz (Standard), 62,5 Hz (Long Range), 20 Hz (Extra Long Range)
<b>IO-Link interface</b>	baud rate: 38400 bps (COM2) process data width: 16 bits IODD files: provide all programming options of top panel interface, plus additional functionality 2,3ms cycle time V1.1.2 Smart Sensor Profile
<b>Connection</b>	2 m cable, M8 4-pole connector
<b>Dielectric strength</b>	500 Vac, 1 min between electronics and housing
<b>Insulating resistance</b>	>20 MΩ, 500 Vdc between electronics and housing
<b>Electrical protection</b>	class 2
<b>Mechanical protection</b>	IP50, NEMA 1
<b>Ambient light rejection</b>	according to EN 60947-5-2
<b>Vibrations</b>	0,5 mm amplitude, 10 ... 55 Hz frequency, for every axis (EN60068-2-6)
<b>Shock resistance</b>	11 ms (30 G) 6 shock for every axis (EN60068-2-27)
<b>Housing material</b>	ABS and polycarbonate
<b>Operating temperature</b>	-10 ... 55 °C
<b>Storage temperature</b>	-25 ... 85 °C
<b>Weight</b>	69 g max. cable vers., 21 g max. conn. vers.

# DIMENSIONS

# CONNECTIONS

# INDICATOR AND SETTINGS

The **RUN/PRG/ADJ Mode Switch** puts the sensor in RUN, PRG (Program), or ADJ (Adjust) mode. RUN mode allows the sensor to operate normally and prevents unintentional programming changes via the **+ /SET/ -** button. PRG mode allows the sensor to be programmed through the display driven programming menu. ADJ mode allows the user to perform TEACH and SET methods and Manual Adjust.

The **LO/DO Switch** is used to select Light Operate or Dark Operate mode.

- A Output LED
- B LO/DO Switch
- C RUN/PRG/ADJ
- D Lever Action Fiber Clamp
- E Red Signal Level
- F Green Threshold
- G +/SET/- Rocker Button
- H CH1 Analog out, CH2 Discrete out (only S70...E3)

As an alternative the sensor can be programmed remotely and the remote input may be used to perform TEACH and SET methods (not available on IO-Link models).

# OF/OFA SERIES

## COMPLETE RANGE OF OPTIC FIBERS: UNIVERSAL OR ADVANCED MODELS

- Ultraflexible models
- High temperature models (up to 125 °C)
- Fiber array with parallel beams for proximity or through beam detection
- Fixed focus proximity with axial, radial or lateral optics
- Proximity with 90° optics self-contained
- Focusing, collimating and deviating lenses

### APPLICATIONS

- Processing and Packaging machinery
- Electronics assembling
- Pharmaceutical industry
- Cosmetic and bottling industries

OF/OFA	
<b>Through beam</b>	Mechanical characteristics, length, diameter of the optic fiber, as well as the switching frequencies, light emitted and resolution of the optic fiber amplifier, affect the operating distances. Refer to the sensor manuals to find the proper operating distance.
<b>Diffuse proximity</b>	
<b>Fixed focus</b>	
<b>OF diameter</b>	Ø2.2 mm or Ø1
<b>OF head</b>	M3, M4, or M6
<b>OFA number of emitted beams</b>	1, 16, 32
<b>Cable lengths</b>	1, 2 m
<b>Operating temperature</b>	-40...+60 °C (OF)
	-40...125 °C (OF-...-HT)
	-30...+70 °C (OFA)
<b>Core material</b>	PMMA plastic
<b>Sheath material</b>	PE plastic
<b>Terminal material</b>	Aluminium (OFA-1/2) ABS (OFA-3/4) Stainless steel (OFA-6)
<b>Mechanical protection</b>	IP67

## COMPACT SIZE AND HIGH PERFORMANCE FOR THE MOST CHALLENGING DETECTION APPLICATIONS LINKED TO YOUR INDUSTRY 4.0 APPLICATIONS

- Compact dimensions (14x42x25 mm)
- Background suppression for transparent and shiny objects
- Contrast sensors up to 25 kHz switching frequency
- Extremely focused spot, under 1 mm (LASER model)
- Very high resolution LASER models
- INOX AISI 316L model
- Extended IO-Link parametrization with counter
- All output fully PNP/NPN/PP IO-Link configurable
- IO-link COM2
- IO-Link dual channel with no jitter addition

### APPLICATIONS

- Processing and Packaging machinery
- Beverage/Food/ Cosmetics/Pharmaceutical industries
- Electronics assembling

(\*) IO-Link models available from July 2020

(\*\*) Stainless steel models. ATEXII 3DG

# TECHNICAL DATA

<b>Power supply</b>	12 ... 30 Vdc (battery inversion protected)
<b>Ripple</b>	2 Vpp max.
<b>Consumption (output current excluded)</b>	30 mA; 35 mA (mod. S8...M01); 20 mA (mod. S8...F), 15 mA (mod. S8...G) max.; 40mA max. all IO-Link Models red LED 660 nm (mod. S8...B01/C/M/G/T)
<b>Light emission</b>	RGB LEDs: blue 465 nm, green 520 nm, red 630nm with automatic selection (mod. S8...W)
	UV LED 375 nm (mod. S8...U)
	red Laser 645..665 nm (mod. S8...B51/B53/M) Class 1
<b>Sensitivity Setting</b>	8-turn distance adjustment trimmer (mod. S8...M53/M)
	teach-in push button (mod. S8...B53/B53...OZ/M53/W03/W03...OZ/W13/T53/T53...OZ/U03/U03...OZ)
	remote input (mod. S8...M53)
	mono-turn trimmer (mod. S8...B01/C/F/M/T51)
<b>Operating mode</b>	automatic auto adjustment (mod. S8...W/T50)
	remote input (mod. S8...M53)
	LIGHT / DARK mono-turn trimmer (mod. S8...B/C/F/T51/T53/U)
<b>Indicators</b>	yellow OUTPUT LED (all models excl. mod. S8...G), OUTPUT/ALARM LED (mod. S8...M53/M/C) green POWER LED
<b>Output</b>	PNP or NPN N.O. ; PNP/NPN/Push Pull fully configurable outputs for all IO-Link models (S8...B53/T53/W03/U03...OZ)
<b>Output current</b>	100 mA (overload protection and short circuit)
<b>Saturation voltage</b>	2 V max.
<b>Response time</b>	1 ms (mod. S8...M53/M)
	500 µs (mod. S8...B/F/C)
	250 µs (mod. S8...T/T53...OZ IO-Link)
	100 µs (Laser vers. mod. S8...M)
	50 µs (mod. S8...W00/W03/W03...OZ IO-Link and Laser mod. S8...B51/B53...OZ IO-Link)
	20 µs (mod. S8...W13)
	250 µs...1 ms (mod. S8...U) and U03...OZ IO-Link
<b>Switching frequency</b>	500 Hz (mod. S8...M53/M)
	1 kHz (mod. S8...B/F/C)
	2 kHz (mod. S8...T/T53...OZ IO-Link)
	5 kHz (Laser vers. mod. S8...M)
	10kHz (mod. S8...W00/W03/W03...OZ IO-Link and Laser mod. S8...B51/B53...OZ IO-Link)
	25 kHz (mod. S8...W13)
	500 Hz...2 kHz (mod. S8...U) and U03...OZ IO-Link
	IO-Link COM2 V1.1.2 2,3ms cycle time
<b>Communication</b>	
<b>Connection</b>	M8 4-pole connector, 150 mm length Ø 4 mm cable with M12 4-pole connector (pig-tail vers.)
<b>Dielectric strength</b>	1500 VAC 1 min between electronic parts and housing
<b>Insulating resistance</b>	>20 MΩ 500 VDC between electronic parts and housing
<b>Mechanical protection</b>	IP67, IP69K (mod. S8-M)
<b>Ambient light rejection</b>	according to EN 60947-5-2
<b>Vibrations</b>	0.5 mm amplitude, 10 ... 55 Hz frequency, for every axis (EN60068-2-6)
<b>Shock resistance</b>	11 ms (30 G) 6 shocks per every axis (EN60068-2-27)
<b>Housing material</b>	ABS, Stainless Steel AISI 316L
<b>Optical window material</b>	window in PMMA; lens in PC
<b>Operating temperature</b>	-10 ... 55 °C
<b>Storage temperature</b>	-20 ... 70 °C
<b>Weight</b>	12 g max. conn. vers., 50 g pig-tail vers., 70 g max. (mod. S8-M)

## CONNECTIONS

### STANDARD MODELS

### IO-LINK MODELS (M8 CONNECTOR ONLY)

\* REMOTE INPUT (mod. S8...W, U, T50, T53), LIGHT / DARK INPUT (mod. S8...M53), DELAY (mod. S8...M Laser), TEST INPUT (mod. S8...G), ALARM OUTPUT (mod. S8...B, T51), NOT USED (mod. S8...C, M, F)

\*\* Fully configurable I/O Pin input or output by IO-Link setting

## ADVANCED MAXI PHOTOELECTRIC MULTIVOLTAGE SENSORS

- Industrial plastic housing with IP67 mechanical protection
- Timing function from 0.6-16 s ON delay, OFF delay and ONE SHOT
- Terminal block for both Vdc and Vac/ Vdc free voltage
- Distance trimmer for mechanical background suppression models

### APPLICATIONS

- Packaging end of line, palletizers
- Outdoor or indoor gates control
- Manufacturing plants

(\*)DC models:

# INDICATORS AND SETTINGS

## Settings

The **M** model presents a **multiturn adjustment screw** for the adjustment of the background suppression distance using a mechanical variation of the optic triangulation angle. The **other models have a mono-turn electronic trimmer** that adjusts the sensitivity and the sensor operating distance. The operating distance can be increased by rotating the screws clockwise. Trimmers can be used to adjust the output activation and deactivation delay time whilst functioning mode selection is performed through DIP SWITCHES.

## HEAVY DUTY SENSOR FOR OUTDOOR APPLICATIONS AND HARSH ENVIRONMENTS

- Industrial plastic housing with IP67 mechanical protection
- Defogging system function
- Double independent timing functions with double time scale from 0-2s or 0-10s, One-Delay, Off Delay, ONE SHOT

### APPLICATIONS

- Packaging end of line, palletizers
- Outdoor or indoor gates control
- Automotive plants
- Automated warehousing

<b>Weight</b>	300 g

# DIMENSIONS

# INDICATORS AND SETTINGS

Two different models are available: high resolution (AS1-HR) or standard resolution (AS1-SR). In the first case the light array has 16 beams, while in the second case the beams are reduced to 6. In the AS1-HR model, the selection inputs of the SCAN MODE, can configure 4 different crossed-beam scanning modes. These different modes allow to vary the detection performances, in particular the resolution can be increased to 0.2mm thickness, or the response time up to less than 3ms.

## INDICATORS AND SETTINGS (TRIMMER VERSION)

Emitter is equipped with a manual regulation which lets the user change the emission power by means of a screwdriver.  
The emission power reduction can be particularly useful to lower passive reflections when maximum operating distance it is not required.

## CONNECTIONS

## HIGH RESOLUTION SCANNING MODE

PROG. N°	SEL_RX	SEL_TX	RESOLUTION	RESPONSE TIME (msec )
1	0 Vdc or FLOAT	0 Vdc or FLOAT	LOW	2.75
2	0 Vdc or FLOAT	24 Vdc	M/L	3
3	24 Vdc	0Vdc or FLOAT	M/H	7.75
4	24 Vdc	24 Vdc	HIGH	8

**Scan mode 1:**  
high speed / low resolution  
Minimum object detection  
Flat = 0.4 (thickness) x 100 (width) mm  
Cylindrical objects = Ø 6 mm

**Scan mode 2:**  
high speed / mid resol. central area  
Minimum object detection  
Flat = 0.4 (thickness) x 90 (width) mm  
Cylindrical objects = Ø 6 mm

**Scan mode 3-4:**  
low speed / high resolution  
Minimum object detection  
Flat = 0.2 (thickness) x 75 (width) mm  
Cylindrical objects = Ø 6 mm

# STANDARD RESOLUTION SCANNING MODE

Note: the scan mode is fixed in the standard resolution version.

## AREASCAN™ DETECTION AND MEASUREMENT LIGHT GRIDS WITH ANALOG OUTPUT

- 4 mm resolution and 1 ms response time
- 100 to 300 mm controlled height
- Operating distance up to 4 m
- PNP digital and 0-10 V analog outputs
- Adjustment trimmer

### APPLICATIONS

- Processing and Packaging machinery
- Food, Cosmetic, Pharmaceutical
- Electronics and mechanical assembling
- Conveyor lines and sorting systems

# S67

## ACCURATE AND PRECISE LASER DISTANCE SENSOR WITH SUBMILLIMETRIC RESOLUTION

- Sturdy metal Die-cast zinc IP67 housing.
- Resolution of 10um@50mm. distance on white 90% remission.
- Response time less than 0,9ms (short range models)
- Linearity error of +/-0,03mm@50mm range.
- Analog Voltage models with 0V-10V protected output.
- Analog Current models with 4-20mA protected output.
- Soiling indicator and Alarm Output.
- Robust light interference suppression.

### APPLICATIONS

- Automotive Industries
- Textile and Paper Industries
- Wood Industries
- General Packaging Industries
- Metal tooling
- Assembly lines
- Mechanical engineering and Special machinery

## S67-MH-5-Y03-I / S67-MH-5-Y13-I

1. (BROWN): +12...28 VDC
2. (WHITE): ANALOGUE OUTPUT- I(4...20mA)
3. (BLUE): 0V
4. (BLACK): NOT USED
5. (GREY): TEACH IN

## S67-MH-5-Y03-V / S67-MH-5-Y13-V

1. (BROWN): +12...28 VDC
2. (WHITE): ANALOGUE OUTPUT- V(0...10V)
3. (BLUE): 0V
4. (BLACK): NOT USED
5. (GREY): TEACH IN

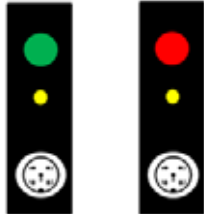

Note: If external Teach-In option is not used, the Teach-In wire must be attached to GND.

Note: Shielded cable is suggested for critical cabling.

Note: Color of wires are referred to European standard.

# INDICATORS AND SETTINGS

**LEDS**

RED LED may indicate ALARM or dirty lens surface.  
GREEN LED is the POWER indicator.

**TEACH IN BUTTON**

The yellow button allows the user to teach a new range by optimizing the resolution. It can be used to reset the factory settings.

The S67Y distance sensor is factory set to the maximum measuring range. In order to optimize the resolution and linearity, its Teach-In feature is designed to select a smaller range within the nominal range. If a new range is chosen the Output current, voltage and alarm output will adapt to it.

The sensor must be taught with two specific positions:

- First Teach-In: aligns the position with 0 V (or 4 mA)
- Second Teach-In: aligns the position with 10 V (or 20 mA)

Note: The two positions are always at the border of the new range (within the measuring range).

The red LED gives feedback during a Teach-In session. The red LED located on the back of the sensor, indicates "Run" mode if it detects an object in the measuring range. The S67Y can be set in two different ways: one with Teach-In button and the other one through the external teach input.

The device can be taught more than 10.000 times in its lifetime. The S67Y may be always reset to factory setup.

TEACHING NEW MEASURE	RESET
<p>Seven steps to teaching a new measuring range:</p> <ol style="list-style-type: none"> <li>1. Press (and hold) the button. The red LED will turn on, if the sensor can be taught.</li> <li>2. Hold down the button for 5 more sec. The LED will start to blink.</li> <li>3. Release the button.</li> <li>4. Place a target at the first new position of the measuring range. This is the position that will later produce 0 V (or 4 mA).</li> <li>5. Briefly press the button again. The LED will stop blinking and will stay on for about 3 sec to indicate that the first position has been stored. Then the LED will blink again.</li> <li>6. Now place the target at the second position (the other end of the new range), which will produce 10 V (or 20 mA).</li> <li>7. Briefly press the button again. The LED will stop blinking and will stay on for about 3 sec to indicate that the second position has been stored. The LED will then turn off and blink once more.</li> </ol> <p>Now the sensor is ready to measure.</p> <p>The new, smaller operating range is now set. The red LED now indicates whether an object is within the new range (LED OFF) or not (LED ON). If one of the new borders of the range was outside the standard range or the two positions were too close to each other, then the new settings are not valid. The sensor will respond with an extended blinking at the end of the teach procedure. The previous settings are still valid and the new settings are lost</p>	<ol style="list-style-type: none"> <li>1. Push the button. The red LED will turn on, if the sensor can be taught.</li> <li>2. Hold down the button further 5 sec. The LED will start to blink. Do not release the button now. Wait another 10 sec until the LED is ON without blinking. Factory settings have been restored to the sensor.</li> <li>3. Release the button.</li> </ol> <p>Note: If there are missed measurements (up to 30 cycles) these will be suppressed. During this time the analog output stays on hold.</p> <p>Note: For objects with a reflectivity &lt; 7 % (S67-MR-5-Y13...), the response/release time is increased automatically up to max. 2.8 ms.</p>

## TIME OF FLIGHT LONG RANGE BACKGROUND SUPPRESSOR

- Long Range background suppression detection up to 5m
- Cost effective solution for precise and reliable detection
- Risk-free Infrared LED emission and embedded green LED pointer
- Two independent fully programmable outputs
- NPN/PNP or IO-Link connection models
- Rugged plastic housing in compact 50x50x24 mm format

### APPLICATIONS

- Presence of all medium and large sized objects on conveyors
- Critical object detection in front of problematic background
- Positioning tasks in palletizing
- Position limiter for deck and robot in automotive manufacturing
- Collision prevention limit switch for AGV applications
- Checking filling level for liquid and objects

## LASER DISTANCE SENSOR FOR PRECISE MEASUREMENT UP TO 20 M WITH MILLIMETRIC RESOLUTION AND REPEATABILITY THROUGH THE TIME OF FLIGHT TECHNOLOGY

- Direct Time Of Flight Technology
- Class 2 visible red LASER for an easy alignment with the target
- Measuring range up to 10m or 20m in the advanced model
- 1 mm resolution, 7 mm accuracy, 1 mm repeatability
- 4-20 mA or 0-10 V scalable analog output and 2 digital outputs
- RS485 serial interface in the advanced model
- Standard M12 connector
- IP67 Industrial metal housing

### APPLICATIONS

- Automated warehousing
- Processing and Packaging machinery
- Industrial vehicles
- Automotive

# INDICATORS AND SETTINGS

Without the procedure setting the sensor is configured to measure distances on a white target from a minimum value of 200 mm and a maximum of 20000 mm, with both switching point placed at 500 mm.

The parameters can be changed by the menu on the display pointing the LASER on the target in the different interested points.

### INDICATORS

- LED 1 | Q1 (yellow)
- LED 2 | Q2 (yellow)
- LED 3 | POWER ON (green),  
OUT OF RANGE (red)

1 2 3

### DISPLAY

- Run/W.UP → Run mode or Warm-up mode
- Q+Q → Digital Output setting → PNP/NPN/Push-Pull
- I/V → Analog Output Setting → Ampere/Volt
- Lock Symbol → Keylock or unlock
- 5-digit display → Value corresponds to Distance in mm

# TL46

## HIGH PERFORMANCE CONTRAST SENSOR FOR COLORED REGISTRATION MARK DETECTION

- Fastest and accurate low jitter model (TL46-WJ)
- Color mode enhanced model (TL46-WE)
- Wide-spectrum RGB or white LED emission
- 5 different models: basic, standard, enhanced, low jitter, color mode
- Automatic, manual and dynamic settings
- 10, 15, 20, 30 or 50 kHz switching frequencies
- Very low jitter down to 7µs (TL46-WJ...)
- NPN/PNP and analog outputs
- Standard mounting, M12 connector rotatable to 5 positions

### APPLICATIONS

- Packaging and labeling machinery
- Beverage/Food/Cosmetic/Pharmaceutical industries
- Printing machinery
- Flexographic printing machinery

AI enabled

MLAS - Machine Learning Assisted Setting

THE SMART VISION SENSOR ENABLED WITH A.I. AND EMPOWERED BY MACHINE LEARNING ASSISTED SETTING ALGORITHMS. SIMPLY CLEVER SOLUTION FOR ALL YOUR PRESENCE AND ORIENTATION OBJECT DETECTION APPLICATIONS

- Machine Learning Assisted Setting
- No vision Tools programming required
- No inspection threshold adjustment
- No need of skilled installers and users
- Fast and Easy Setting like standard photosensor
- Deterministic response time 50ms
- Reduced cost of ownership and maintenance
- TEACH Button and comprehensive UI with 5 status LEDs
- Electronic focus control
- 50...150mm operating distance
- Bright and visible Red LED pointer
- Powerful white polarized light illuminator
- Green/Red LED Spot for GOOD/NO GOOD part
- Ethernet point to point communication available
- Easy and Intuitive WEB Server GUI for maintenance and job setting
- Easy output interface photosensor like

### APPLICATIONS

- Processing and packaging machinery
- Transport and handling lines
- Assembly lines
- Food & Beverage
- Bottling lines
- Machines for the Cosmetic and Pharmaceutical sector

### ELECTRICAL FEATURES

<b>Power</b>	
Supply Voltage (Vdc)	10 to 30 Vdc
Consumption (A) Max.	0.40 - 0.14 A (4.2 W)
<b>Communication Interface</b>	
Ethernet <sup>1</sup>	10/100 Mbit/s
<b>Inputs</b>	Opto-coupled and polarity insensitive
Max. Voltage	30 Vdc
Max. Input Current	10 mA
<b>Output Type</b>	Push-pull, NPN or PNP, short circuit protected
<b>Outputs</b>	3 Outputs (DATA VALID, GOOD, NO GOOD)
$V_{OUT} (I_{LOAD} = 0 \text{ mA}) \text{ Max.}$	30 Vdc
$V_{OUT} (I_{LOAD} = 100 \text{ mA}) \text{ Max.}$	3 Vdc
$I_{LOAD} \text{ Max.}$	100 mA

<sup>1</sup> The embedded Ethernet interface is intended for configuration only through connection to the device IP. Point-to-Point connection is recommended.

# TECHNICAL DATA

## Optical and Detection Features

<b>Operating distance</b>	50...150 mm
<b>View angle</b>	19°
<b>FOV area @ 50 mm</b>	22 mm (H) x 16 mm (V)
<b>FOV area @ 150 mm</b>	55 mm (H) x 41 mm (V)
<b>Response Time</b>	50 ms
<b>Max. Image to handle (GOOD+NO GOOD)</b>	6 images
<b>Max pcs per second</b>	20 pcs per second
<b>Active Area Resolution</b>	320x240 pixels
<b>Illuminator</b>	White LED polarized

## Physical Features

<b>Dimensions</b>	H x W x L
<b>Std SPH connector at 0°</b>	78 x 47 x 38 mm (3.1 x 1.9 x 1.5 in)
<b>Std SPH connector at 90°</b>	58 x 47 x 58 mm (2.3 x 1.9 x 2.3 in)
<b>Weight</b>	173 g (6.1 oz)
<b>Material</b>	Aluminum with plastic PMMA protective window

## Environmental Features

<b>Operating Temperature<sup>2</sup></b>	-10 to 50 °C (14 to 122 °F)
<b>Storage Temperature</b>	-20 to 70 °C (-4 to 148 °F)
<b>Max. Humidity</b>	90% non-condensing
<b>Vibration Resistance</b>	14 mm @ 2 to 10 Hz; 1.5 mm @ 13 to 55 Hz; 2 g @ 70 to 500 Hz; 2 hours on each axis
<b>Shock Resistance</b>	30 g; 11 ms; 3 shocks on each axis
<b>Protection Class<sup>3</sup></b>	IP65 and IP67

1 The embedded Ethernet interface is intended for configuration only through connection to the device IP. Point-to-Point connection is recommended.

2 High ambient temperature applications should use metal mounting bracket for heat dissipation.

3 When correctly connected (fully tightened) to IP67 cables with seals.

# DETECTION DIAGRAMS

# FIELD OF VIEW CALCULATION

Use the data in the following table to calculate the FOV for your application, referring to the draw and the formula below.

$D_0$	View angle horizontal	View angle vertical	View angle diagonal	Min Reading Distance mm
11 mm	19°	14,5°	24°	50 mm

The viewing angle has a tolerance of  $\pm 1^\circ$  depending on the reading distance.

$$FOV_x = 2 [ (d + d_0) * \tan (\alpha/2) ]$$

where:

**FOV<sub>x</sub>** = horizontal, vertical or diagonal FOV

**$\alpha$**  = horizontal, vertical or diagonal viewing angles.

**d** = reading distance (in mm) from window surface to code surface

**$d_0$**  = offset (in mm) from center of lens to external window surface

Example:

The FOV at a **reading distance of 100 mm** is:

$FOV_H = 2[(100\text{mm} + 11\text{mm}) * \tan(19^\circ/2)] \cong 37\text{mm}$

$FOV_V = 2[(100\text{mm} + 11\text{mm}) * \tan(14,5^\circ/2)] \cong 28\text{mm}$

## OPERATING PRINCIPLES AND APPLICATIONS

### Smart-VS simply clever

The Smart-VS is a Smart vision sensor simple and clever. It is simple outside since it can be handled and used like a standard photoelectric sensor but powerful and smart inside with a multiprocessor platform supporting and embedding the Artificial Intelligence technology. Its customized machine learning algorithms are empowering the detection system core enabling very complex and accurate object classification ensuring at same time a very simple setting procedure by the user

The user does not have to take care about programming or setting threshold of different vision tools, all these complex functionalities are operated by the Smart-VS "brain".

The detection function will be accomplished with three easy and fast steps. The quick step is the GOOD condition teaching the second step is no good condition teaching the third will turn the sensor in learning and normal run status ready to detect GOOD or NO GOOD objects. The user will just present the objects in front of sensor eye and push the button to change acquisition steps until the sensor will start to think and act.

The sensor is especially suited for all the applications where it is needed to solve detection between two well specified object condition classes, like presence or absence of a specific feature or object orientation respect two sides, teaching the sensor with GOOD and NO GOOD condition.

The Smart-VS principle of working is to teach the sensor with GOOD and NO GOOD object condition, this is the basic rule for any application.

This is the reason why it can be used in an effective and reliable way for the presence/absence of object features for side orientation of objects referring to proper object attributes.

This working principle makes the sensor setting easy and independent by the type, material, color of the object that needs to be detected.

Application name		Solved cases (OK / NOT OK)	
Check label presence			
Cap orientation			
Cap presence			
Check printing on label			

The main application targeted for the best use of the Smart-VS is mainly related to print and apply application where it is needed to detect presence or absence of Labels or text printing.

Liquid filler machineries where it is needed to detect the presence/absence of any kind of cap on any kind of bottles, vials, flasks, phials of any material, does not matter if made of glass, plastic or with bright dark color shiny surfaces and different dimensions. Just make the sensor teach and learn the GOOD/NO GOOD condition and it will work. You do not need to set vision tools, sensitivity thresholds, image exposition, focus, sensor positioning or sensor sensitivity.

Bottling machines where it is needed to check if the label is present or not on the object making the sensor learning the presence/absence and then make it work immediately without additional settings, just pressing a push button or building up different receipts for different formats with an effective and easy WEB GUI interface.

### Application name

Check label presence	
Cap orientation	
Cap presence	
Check printing on label	

## A great value for all the applications

The Smart-VS redefines the standard detection eliminating all the concerns regarding the use of standard sensors about unstable detection or complex installation layouts to perform the presence/absence or orientation applications, a Smart-VS based system will ensure:

- more stability in terms of different object materials and shape
- excellent stability on glass and metal parts
- more simple system installation
- more flexibility and adaptability about different production format
- easy setting avoiding more expensive and complex devices
- lower cost of ownership and maintenance

# SMART-VS SETTING METHODS

## Easy and Comprehensive system integration

The Smart-VS is very easy and simple to integrate in any application, it can be implemented like a sensor product, but it is much simpler than a smart camera or an ordinary smart sensor.

It is needed to provide a trigger signal by machine electrical phase or an external simple sensor or an encoder. The PC or Ethernet based terminal is an option needed to change configuration of the sensor (once a time) or for more complex set-up where it is needed to change and/or add job setting through the web interface with a browser, in most cases the need to have this connection is not necessary. The web interface can be a useful tool in case of trouble shooting

## WEB INTERFACE

The Smart-VS is provided of a WEB Server User interface for an easy set-up and setting. This is a good option feature when it is needed to setup and change different production jobs depending on variable production format. The information are complete and shown in a clear layout.

# IO-Link Master

**DATALOGIC**

## CBX-8IOL-XXXX

- Eight M12 IO-Link ports to PROFINET or Ethernet IP, which allows up to eight sensor or actuator connections on a single master
- L-Coded power connectors
- Rugged IP67 housing design for harsh environments
- Dual Ethernet ports
- Additional digital input on every port
- Power port sharing capability
- PLC access to IO-Link ISDU blocks without complex programming
- Supports the IOL\_CALL function
- OPC-UA based technology
- Web server User Interface
- Download/Upload and handling of IODD files directly on Master unit

## APPLICATIONS

- Processing and Packaging machinery
- Conveyor lines, material handling
- Ceramics intralogistics
- Automated warehousing
- Industry 4.0 based applications

## GENERAL VIEW

### CBX-8IOL Master

The IO-Link Master is a very versatile industrial standard device. It provides the best solution about IO-Link gateway systems the embedded OPC-UA based technology.

This new device series combines all the IO-Link standard technology benefits with OPC-UA and Field buses like Ethernet-IP, Profinet and Modbus all together in one family with two different devices to select the appropriate bus technology.

The IO-Link Master is able to run simultaneously different technologies allowing the use of OPC-UA without the need of a PLC included in the system saving hardware and software cost. The IO-link data can be sent by an IO-Link sensor directly up to any SCADA or HMI software system.

The unique and integrated WEB server Technology allows to get connected with your sensor bank just with a ethernet based device and using any commercial internet browser, setting and reading sensor parameters in the most efficient and easy way.

# CONNECTIONS

## CONNECTING THE POWER

The CBX-IOL-8-PNIO provides M12 (5-poles) L-coded input and output power connectors. Use a 24VDC power supply capable of the total output current required.

*Note: Power connectors must have an approved cable or protective cover attached to the port for IP67 compliance.*

PIN	POWER INPUT (MALE)	POWER OUTPUT OR ACTUATOR POWER (FEMALE)	DESCRIPTION
1	US+	US+ or +V	IO-Link Master's system electronics and IO-Link devices
2	UA-	UA- or 0V	Actuator supply
3	US-	US- or 0V	IO-Link Master's system electronics and IO-Link devices
4	UA+	UA+ or +V	Actuator supply
5		FE	

## CONNECTING THE NETWORK

The IOLM provides two Fast Ethernet (10/100BASE-TX) M12, 4-pin female D-coded connectors.

PIN	SIGNAL
1	Tx+
2	Rx+
3	Tx-
4	Tx-

You can use this procedure to connect the IOLM to the network.

1. Securely connect one end of a shielded twisted-pair (Cat 5 or higher) M12 Ethernet cable to either Ethernet port.
2. Connect the other end of the cable to the network.
3. Optionally, use the other Ethernet port to daisy-chain to another Ethernet device.
4. If you did not connect both Ethernet ports, make sure that the unused port is covered with a connector cap to keep dust and liquids from getting in the connector.

*Note: Ethernet ports must have an approved cable or protective cover attached to the connector to guarantee IP67 integrity.*

# INDICATORS AND SETTINGS

## SETTINGS

Follow these steps to change the default rotary switch settings:

1. Gently open the window using a small flathead screwdriver.
2. Gently swing open the switch window from the top to the bottom, allowing it to pivot on the hinge on the bottom of the window.
3. Turn each dial to the appropriate position using a small flathead screwdriver.  
The default setting is 000 as shown above. The arrow points to the switch location. 0 is located at the 9:00 position. Turn the dial clockwise to the appropriate setting.
4. Close the window and make sure that it snaps shut tightly.  
Failure to close the configuration window properly may compromise IP67 integrity.

## INDICATORS

### CBX-IOL-8-xxx LEDs

The CBX-IOL-8-EIP (8-port IP67 model with an L-coded power connector) provides these LEDs.

### LED Activity During Power On Sequence - CBX-IOL-8-xxx LEDs

1. The **US** LED lights.
2. The **ETH1/ETH2** LED lights on the connected port.
3. The **MOD** and **NET** LEDs are lit.
4. The IO-Link LEDs flash (if no IO-Link device attached) or are lit if an IO-Link device is attached. The **MOD** LED is solid green, the IO-Link Master is ready for operation.

CBX-IOL-8-EIP LEDs	
US	<p>The <b>US</b> LED provides the following information:</p> <ul style="list-style-type: none"> <li>▪ Green solid = The IO-Link Master is powered</li> <li>▪ Red solid = Power input voltage below 18VDC</li> </ul>
UA	<p>The <b>UA</b> LED provides the following information:</p> <ul style="list-style-type: none"> <li>▪ Green solid = The IO-Link Master is powered</li> <li>▪ Red solid = Power input voltage below 18VDC</li> </ul>
MOD (Module Status)	<p>The <b>MOD</b> LED provides the following information:</p> <ul style="list-style-type: none"> <li>▪ Off = No module status</li> <li>▪ Green and red flashing = Self-test</li> <li>▪ Green flashing = Standby – not configured</li> <li>▪ Green solid = Operational</li> <li>▪ Red flashing = Minor recoverable fault - check the <b>EtherNet/IP Diagnostics</b> page to locate the issue</li> <li>▪ Red solid = Major unrecoverable fault</li> </ul>
NET (Network)	<p>The <b>NET</b> LED provides the following information:</p> <ul style="list-style-type: none"> <li>▪ Off = No IP address</li> <li>▪ Green and red flashing = Self-test</li> <li>▪ Green flashing = An IP address is configured, but no CIP connections are established, and an Exclusive Owner connection has not timed out</li> <li>▪ Green solid = Active EtherNet/IP or Modbus connection and no EtherNet/IP connection time-outs</li> <li>▪ Red flashing = One or more EtherNet/IP connection time-outs</li> <li>▪ Red solid = Duplicate IP address on network</li> </ul>
 1-8	<p>This LED provides the following information about the IO-Link port</p> <ul style="list-style-type: none"> <li>▪ Off = SIO mode - signal is low or disabled</li> <li>▪ Yellow = SIO mode - signal is high</li> <li>▪ Red flashing = Hardware fault - make sure that configured IO-Link settings on the port do not conflict with the device that is attached: <ul style="list-style-type: none"> <li>- <b>Automatic Upload</b> and/or <b>Download</b> is enabled and it is not the same device</li> <li>- <b>Device Validation Mode</b> is enabled and it is not the correct device</li> <li>- <b>Data Validation Mode</b> is enabled but there is an error</li> </ul> </li> <li>▪ Red solid = PDI of the attached IO-Link device is invalid</li> <li>▪ Green solid = An IO-Link device is connected and communicating</li> <li>▪ Green flashing = Searching for IO-Link devices</li> </ul>
Port 1-4 DI	<p>The <b>DI</b> LED indicates digital input on DI (Pin 2)</p> <ul style="list-style-type: none"> <li>▪ Off = DI signal is low or disconnected</li> <li>▪ Yellow = DI signal is high</li> </ul>
ETH1/ETH2	<p>The <b>ETH1/ETH2</b> LEDs provide the following information:</p> <ul style="list-style-type: none"> <li>▪ Green solid = Link</li> <li>▪ Green flashing = Activity</li> </ul>

# IO-LINK SETTING AND CONNECTIONS

The CBX-IOL-8-EIP provides eight IO-Link ports with M12, 5-pin female/A coded connectors. Each port has robust over-current protection and short circuit protection on its L+/L- power output and C/Q IO-Link signal. The pin-out for each IO-Link port is per the IO-Link standard and is provided in the following table:

This table provides signal information for the IO-Link connectors.

PIN	SIGNAL	COLOR	DESCRIPTION
1	L+		IO-Link device power supply (+24V)
2	DI		Digital input
3	L-		IO-Link device power supply (0V)
4	C/Q		Communication signal, which supports SDCI (IO- Link) or SIO (standard input/output) digital I/O
5	FE		Functional Earth (electronics wiring)

The standard SDCI (IO-Link) transmission rates are supported:

- COM1 at 4.8Kbps
- COM2 at 38.4Kbps
- COM3 at 230.4Kbps

There are active over-current limiter electronics for each port in the CBX-IOL-8-EIP that detects the overload/short-circuit condition within a few milliseconds and shuts off the output power to protect the port and the devices connected to it. The port’s power output self-recovers and restores to normal immediately after the overload or short-circuit condition is removed.

When a port is affected by overload/short-circuit condition, it does not affect the operation of the other ports. All other ports will continue to operate normally without any glitch or interruption. The current output capacity, cutoff current, and power sharing/budgeting for L+/L- and C/Q signal for the ports on the CBX-IOL-8-EIP are as follows.

# R-SERIES REFLECTORS

## EXCELLENT PERFORMANCE WITH INFRARED, RED LIGHT AND POLARIZED EMISSION

- Prismatic reflectors for retroreflective sensors
- High efficiency models for long operating distances
- Microprism reflectors for sensors with LASER emission
- Self-adhesive reflectors and reflector tape

### APPLICATIONS

- Automated warehousing
- Processing and Packaging machinery
- Industrial vehicles
- Automotive

### REFLECTORS

<b>Prismatic reflector material</b>	Reflector in PMMA plastic
<b>Support material</b>	Support in ABS
<b>Reflective tape</b>	Polyester
<b>Mechanical protection</b>	IP67, IP69K (R4K)
<b>Operating temperature</b>	-30 ... +70°C

# CS Series Cables & Connectors

## THE RIGHT CONNECTION FOR YOUR PHOTOELECTRIC SENSORS FOR INDUSTRIAL ENVIRONMENT

- M8 and M12, axial or radial female connectors
- Standard length cables: 2, 3, 5, 7, 10, 15, 25 or 50m
- 3, 4, 5, 8 or 12 poles
- Shielded or unshielded models
- P.U.R. coated models for use in harsh environments
- P.V.C. coated models for standard use
- Standard M12 4 pole non-cabled connectors
- The cable jacket maybe marked 300V only as insulation voltage between wires, the operational voltage is 24Vdc or 10-30Vdc, less than 80 V required by CCC-China

CS	
<b>Connectors</b>	M8 axial or radial(90°) 3 poles M12 axial or radial(90°) 3 poles M8 axial or radial(90°) 4 poles M12 axial or radial(90°) 4 poles M12 axial 5 poles M12 axial 8 poles

# COMPLEMENTARY SENSORS

## Inductive proximity

### IS

Non-contact detection  
Cost effective and reliable detection of any metal part

#### Technical data

- Standard proximity M4, M5, M8, M12, M18, M30
- Double range (i.e. M12 4mm, M18 14mm, M30 20mm)
- Unshielded or shielded models for flush mounting
- Nickel brass or stainless steel short and long housing
- Ecolab and Diversey certifications for industrial detergents
- Multi-voltage, Metal face, Weld field immune models
- NO/NC, NPN or PNP output and programmable versions.

#### Applications

- Processing and Packaging machinery
- Assembling and conveyor lines
- Metal working and machine tools

## Ultrasonic sensor

### US

Distance measurement  
Accurate positioning or distance control, immune to object color or light reflection

#### Technical data

- Square miniature or M18 background suppression with range 5 - 50cm and through beam up to 60cm
- M30 with range 0.2 - 2 m and min object 10mm
- M50 with range 0.2 - 8 m and min object 20mm
- Teach-in push-button and remote teach input
- NPN and PNP switching outputs for object detection
- 0-10 V or 4 - 20 mA analog out for distance measure
- High resolution to 1mm or 0.1% of distance range

#### Applications

- Packaging machinery
- Beverage and bottling plants
- Paper reel unwinding control

## Fork sensors

### SRX3

High resolution, fast response time  
Execution of precise positioning, applying and printing of labels, even with any type/format of labels and bearer tapes, transparent on transparent and metallic ink

#### Technical data

- Dynamic or static teach models
- Slot size 3mm
- High resolution up to 2mm label gap
- M8 connector with PNP or NPN output
- M12 connector with PNP/NPN output and external teach-in
- Rugged and sturdy aluminium housing

#### Applications

- Detection of transparent, opaque labels, metallic ink label
- Double sheet detection
- Adhesive surface detection

## Incremental encoders

### ENC41/ENC58

Versatile and flexible incremental encoders with compact and standard dimensions. Hollow or solid shaft and universal output circuit

#### Technical data

- Plastic or aluminium housing Ø41mm and Ø58mm
- Hollow or solid shaft
- Resolution from 1 to 10000 PPR
- 1.5m cable connection
- ABO/ABO output signals
- Smart Push-Pull & Line-Drive output
- Power supply 5 - 30 Vdc

#### Applications

- Working and assembly lines
- Packaging machinery
- Light conveyors

## Programmable incremental encoders

### IEP58

Programmable incremental encoder reduces storage cost and downtime with to customer specific programming.

#### Technical data

- Standard housing Ø 58mm
- Resolution from 1 to 16384 PPR
- 1.5m cable connection
- ABO/ABO output signals
- Smart Push-Pull & Line-Drive output
- Power supply 5 - 30 Vdc

#### Applications

- Automated machinery
- Conveyor lines

## Absolute encoders

### AST58/AMT58

Compact optical single and multi-turn encoder  
Extremely high accuracy  
Serial interface SSI up to 25 bit  
Modular fieldbus ProfiBus, Profinet; EtherCat, DeviceNet, CanOpen up to 30 bit.

#### Technical data

- Aluminium anticorodal metal case Ø58mm
- Solid shaft Ø6 or 10mm, hollow shaft Ø15mm
- M12, M23, or 1.5m cable connection
- Power supply 7.5 - 34 Vdc

#### Applications

- Motion control
- Automated machinery
- Length measurement/positioning
